

Appendix K

HELPP Ticket Security Features

H.E.L.P.P SECURITY FEATURES

PAYOUT

Lists the winning symbol combinations, the corresponding prize amounts and the number of winners in a deal of H.E.L.P.P. Tickets. Each combination of winning symbols is referred to as a "tier."

SERIAL NUMBER

A unique number is printed on all of the tickets in a deal.

WINNING TICKETS

The individual ticket as a whole is identified as a winner by placing an A1 through A5 at random on the left side of any window on a winning ticket (e.g., a winning ticket with a \$125 prize would feature an "A1." A \$100 winning ticket would feature an "A2," etc.).

WINNING COMBINATION

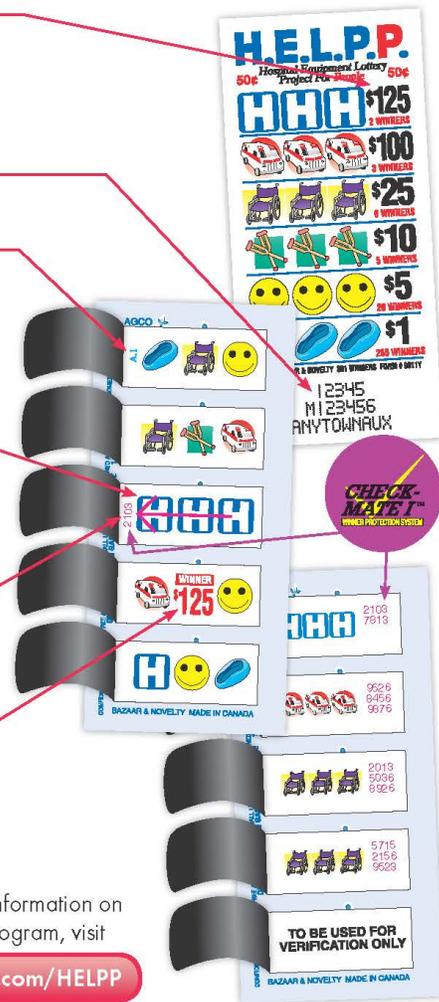

Combination of symbols on winning tickets that corresponds to the tiers listed on the front of the ticket and determines the prize payout. There is a line with an arrow pointing to the left through the three winning symbols to quickly identify this as a winning ticket.

CHECKMATE®

Random number printed on only the top few tiers of winners. The number is matched to a separate Checkmate security ticket unique to the deal.

PAY MATE

Dollar amount on all winning tickets instantly shows the total prize amount to be paid to player.
